Proceedings of the  
10th International Congress of  
**CHEMOTHERAPY**  
Zurich 1977

Published by the American Society for Microbiology

Scheduled for Publication, February 1978

In 2 volumes, 1,700 pages of extended abstracts. \$75.00 (Members of ASM may purchase the 2-volume set for \$30.00. Payment must accompany member orders)

These *Proceedings* represent the most exhaustive and up-to-date compendium of antimicrobial and anticancer knowledge available. The 28 symposia include:

- Rational Approach to Different Therapeutic Procedures
- Kinetic Analysis in Chemotherapy: Problems and Clinical Relevance
- The Threat of Multiple Drug Resistance
- Modes of Action of Antimicrobial Agents
- Assay Techniques (New Methods)
- Indications for Chemoprophylaxis
- Life Threatening Infections in the Compromised Host
- Activation of Cellular and Humoral Immunity for the Treatment of Infectious Diseases
- Chemotherapy of Tuberculosis
- Chemotherapy of Anaerobic Infections
- Chemotherapy of Viral Diseases
- Chemotherapy of Parasitic Diseases
- Chemotherapy of Fungal Diseases
- Infective Endocarditis
- Recurrent Urinary Tract Infections and Pylonephritis
- Viral Hepatitis
- Patterns of Use of Antimicrobial Agents in General Hospitals
- Effect of Subinhibitory Concentrations of Antibiotics on Bacteria
- New Anticancer Drugs
- Cell Kinetics and Pharmacodynamics of Anticancer Drugs
- Immunodepression and Immunotherapy
- Toxicological Evaluation of New Anticancer Drugs
- Combined Modality Concept: Radiotherapy, Chemotherapy, Immunotherapy and Adjuvant Chemotherapy
- Modes of Acquiring Resistance to Chemotherapeutic Agents
- Chemotherapy of Non-Hodgkin-Lymphoma
- Chemotherapy of Gastro-Intestinal Carcinoma
- Chemotherapy of Breast Cancer
- New Systems for the Detection of Antitumor Drugs

This new publication is a *must* for every library, research institution, and department where information about cancer research is needed.

# MICROBIOLOGY-1978

---

Editor-in-Chief:  
David Schlessinger

Publication Date: January 1978  
*Order your copy today.*

*The latest information from four vital ASM conferences and symposia.*

**Extrachromosomal Elements**

Studies of cloned chromosome fragments, and of the evolution of interacting transposable DNA elements provide a classic guide for the next decade of chromosome analysis and gene transfer work

**Nitrification and Reduction of Nitrogen Oxides**

How microbiological research can solve some environmental problems

**Cellular and Molecular Biology of Mycoplasma and Bacterial L-Forms**

Summary of recent progress in this important field

**Human Papovaviruses**

For the first time, recent provocative studies are summarized

## **Bibliographical and Ordering Information**

*Microbiology — 1978.* 448 pages. Clothbound. ISBN: 0-914826-15-8. LC #74-33538. \$22.00. ASM Members may obtain this title, for personal use only, at \$12.00, prepaid. (Note: All overseas orders must be prepaid before title is shipped.)

Annual Microbiology Series:  
Standing orders to the series are welcome.  
Also available:

*Microbiology — 1974; Microbiology — 1975; Microbiology — 1976; Microbiology — 1977.* (All at the price of \$12.00, prepaid, to ASM members, \$22.00 to others: overseas orders must be accompanied by payment, or prepaid before shipment.)

**American Society for Microbiology**  
1913 I Street, NW, Washington, DC 20006

## Just what you've been waiting for.

And waiting and waiting... 12 to 24 hours for your microbiological antibiotic test results. But who has that kind of time?

We now offer a complete RIA Aminoglycoside package, kits for measuring Gentamicin, Amikacin and Tobramycin. Three level aminoglycoside controls are available. Test time: 1½ to 2 hours.

Lyophilized for longer shelf life and easy shipment, each assay is a double antibody PEG separation with pre-measured calibrators. Each has all the necessary reagents and a specific anti-sera to eliminate drug

cross-reactivity. Procedures for the three have been standardized.

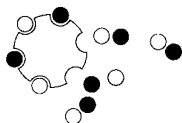

Our advanced R&D has solved the problems of other RIA methodologies for these antibiotics.

Which adds up to this: Our RIA Antibiotics package can now offer superior test results in 1½ to 2 hours, not questionable data in 24 hours.

In stat situations, it means timely patient treatment. And lives saved.

**RIA Antibiotics from DPC.**

**Isn't that what you've been waiting for.**
