

## ERRATUM

### Field Evaluation of a Novel Colorimetric Method—Double-Site Enzyme-Linked Lactate Dehydrogenase Immunodetection Assay—To Determine Drug Susceptibilities of *Plasmodium falciparum* Clinical Isolates from Northwestern Thailand

Alan Brockman, Sittaporn Singlam, Lucy Phiaphun, Sornchai Looareesuwan,  
Nicholas J. White, and François Nosten

*Shoklo Malaria Research Unit, Mae Sot, Tak 63110, and Faculty of Tropical Medicine, Mahidol University, Bangkok 10400, Thailand; Australian Centre for International Tropical Health and Nutrition, University of Queensland, Brisbane, Australia; and Centre for Tropical Diseases, Nuffield Department of Clinical Medicine, John Radcliffe Hospital, Headington, Oxford, United Kingdom*

Volume 48, no. 4, p. 1426–1429, 2004. Page 1429: Acknowledgments were inadvertently omitted and should read as follows.

This study was part of the Tak Malaria Initiative, funded by the Bill and Melinda Gates Foundation. François Nosten and Alan Brockman were supported by the Wellcome Trust of Great Britain. SMRU is part of the Wellcome-Mahidol University-Oxford Tropical Medicine Research Programme.

We are indebted to the Karen patients who provided the blood samples and the Karen staff for technical assistance in sample collection. We sincerely thank Phillipe Brasseur and Alicia Moreno for demonstrating the DELI assay, Pierre Druilhe and Michael Makler for supplying monoclonal antibody, Kamajitra Jenjaroen for excellent technical support, and Timothy Anderson for use of a beta counter.
