

Correction for Gómez-Sanz et al., “First Staphylococcal Cassette Chromosome *mec* Containing a *mecB*-Carrying Gene Complex Independent of Transposon Tn6045 in a *Macroccoccus caseolyticus* Isolate from a Canine Infection”

Elena Gómez-Sanz,* Sybille Schwendener, Andreas Thomann, Stefanie Gobeli Brawand, Vincent Perreten

Institute of Veterinary Bacteriology, Vetsuisse Faculty, University of Bern, Bern, Switzerland

Volume 59, no. 8, e05064-14, 2015, <https://doi.org/10.1128/AAC.05064-14>. The *Macroccoccus caseolyticus* strain KM45013 was recently classified as a novel species named *Macroccoccus canis* (S. Gobeli Brawand, K. Cotting, E. Gómez-Sanz, A. Collaud, A. Thomann, I. Brodard, S. Rodriguez-Campos, C. Strauss, and V. Perreten, *Int J Syst Evol Microbiol* 67:621–626, 2017, <https://doi.org/10.1099/ijsem.0.001673>). Strain KM45013 actually represents the type strain of *Macroccoccus canis*. Therefore, “*Macroccoccus caseolyticus* KM45013” should be replaced with “*Macroccoccus canis* KM45013” throughout the entire paper.
